

# 2024 Training and e-Learning Course Calendar

[Enroll in Courses](#)

## Moderated Courses

These courses are offered through the platform with the support of a moderator and a tutor. The moderator ensures all administrative issues are addressed and the tutor provides the technical expertise and answers all questions related to the subject matter.

In a moderated course, the moderator and the tutor meet with the registered learners in a live session for one hour per week for the duration of the course.

One or two modules are released each week and a course has a set time of four to six weeks for completion.

### Introduction to Network Operations

Cycle 1 15 January–11 February

Cycle 2 08 April–05 May

Cycle 3 24 June–21 July

### Advanced Network Operations 2.0

Cycle 1 15 January–11 February

Cycle 2 08 April–05 May

Cycle 3 24 June–21 July

### Encryption

Cycle 1 15 January–11 February

Cycle 2 08 April–05 May

Cycle 3 24 June–21 July

### Internet Governance

Cycle 1 29 January–25 February

Cycle 2 08 April–05 May

Cycle 3 24 June–21 July

### Fundamentals of Designing and Deploying Computer Networks

Cycle 1 15 January–25 February

Cycle 2 08 April–19 May

Cycle 3 24 June–11 August

### Mutually Agreed Norms for Routing Security (MANRS)

Cycle 1 15 January–11 February

Cycle 2 08 April–05 May

Cycle 3 24 June–21 July

### Community Networks Readiness Assessment

Cycle 1 15 January–25 February

Cycle 2 08 April–19 May

Cycle 3 24 June–11 August

## Attention!

We have closed out all our course offerings in 2024 and will resume offering our scheduled courses on 13 January 2025. However, chapters and training partners can request training directly through this email: [kioni@isocdfoundation.org](mailto:kioni@isocdfoundation.org).

## Self-Paced Courses

Self-paced courses are offered through the LMS without a moderator or a tutor. The learner is free to take the courses in their own time and at their own pace.

## Tracks

In 2024, the Internet Society will recognize learners have acquired knowledge and skills by taking more than one course in an area of specialization. When learners successfully complete a track, they earn a certificate of completion and qualify to join our alumni network.

### Network Operations Specialist

This certification is for those who have completed:

- Fundamentals of Designing and Deploying Computer Networks
- Introduction to Network Operations 1.0
- Advanced Network Operations 2.0
- IPV6

### Online Safety Specialist

This certification is for those who have completed:

- Digital Footprints
- Privacy
- Encryption
- Internet Security

### Internet Defense Champion

This certification is for those who have completed:

- What the Internet Needs to Exist
- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Fundamentals of Designing and Deploying Computer Networks

### Internet Policy and Advocacy Champion

This certification is for those who have completed:

- What the Internet Needs to Exist
- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Encryption
- Internet Governance

### Government Track - Internet Policy and Advocacy Champion

This certification is for those who have completed:

- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Government Encryption
- Internet Governance
